The Basics is similar in design to our Flexline system. The accessory uprights are included in the base station and the work surface adjusts from 30" to 36" high on 1" increments. From floor to top of frame is 65" high. The Basics station and frame bolt together to keep freight cost down and to minimize storage space when not in use. The Basics is available as a single sided stand alone station or a double sided stand alone station. To help keep cost down, add on stations are available for both the single sided and double sided stations.

WIRE HARNESS ASSEMBLY STATIONS

The MWH and the EWH models are designed for the ergonomic assembly of wire harnesses. Both models feature a 72" long x 36" wide platform capable of holding boards from 24" wide x 24" long up to 48" wide x 96" long. Both models incorporate an adjustable front guardrail that captivates boards from .250" to .750" thick. The EWH features a 60 degree electric foot pedal operated tilt with 600 pounds capacity. When the EWH is fully tilted, the front edge of board adjusts from 24.5" to 40.5" high via foot pedal operation. The MWH features a 13 position manual 60 degree tilt and 150 pound capacity. When the MWH is fully tilted, the front edge of the board adjusts from 24" to 36" via hand crank.

0° - 30° WORK SURFACE TILT MECHANISM

Add to base price of station.

Often a tilted work surface allows operators to reduce lower back and arm fatigue. A front lip on the work surface keeps work in process on the table.

Electric Tilt – activated by push button or pedal.

Hydraulic Tilt – activated by hand crank

Mechanical Tilt – activated by lifting surface manually (13 positions)

Tilt option must be purchased with initial bench order.

PART NO.	DESCRIPTION	Wgt. (lbs)	Wgt. (cap)
ET-1	Electric Tilt	42	400
HT-1	Hydraulic Tilt	49	300
MT-1	Mechanical Tilt	25	75
