

Our unique approach to business is why we're the leader.

Monoflo designs, manufactures and ships more distribution containers than any other company in America.

Defining what comes next.

Achieving optimum performance for your bottom line begins with our innovative manufacturing technologies.

We offer the most efficient, highest performing products for your business. Each of our customers works with an assigned, expert distribution industry manager so everyone receives the focused attention needed to enhance the development and implementation of their reusable packaging strategies.

We do it by providing...

- 1. Responsive service**
- 2. Superior engineering**
- 3. Quality & efficiency**
- 4. Customization**
- 5. Recycling & sustainability**

Industry-Leading Innovation: **Plastic Hinge Design**

We're always striving to improve on a good thing. Continuous, innovative product improvement and development is an integral part of our culture.

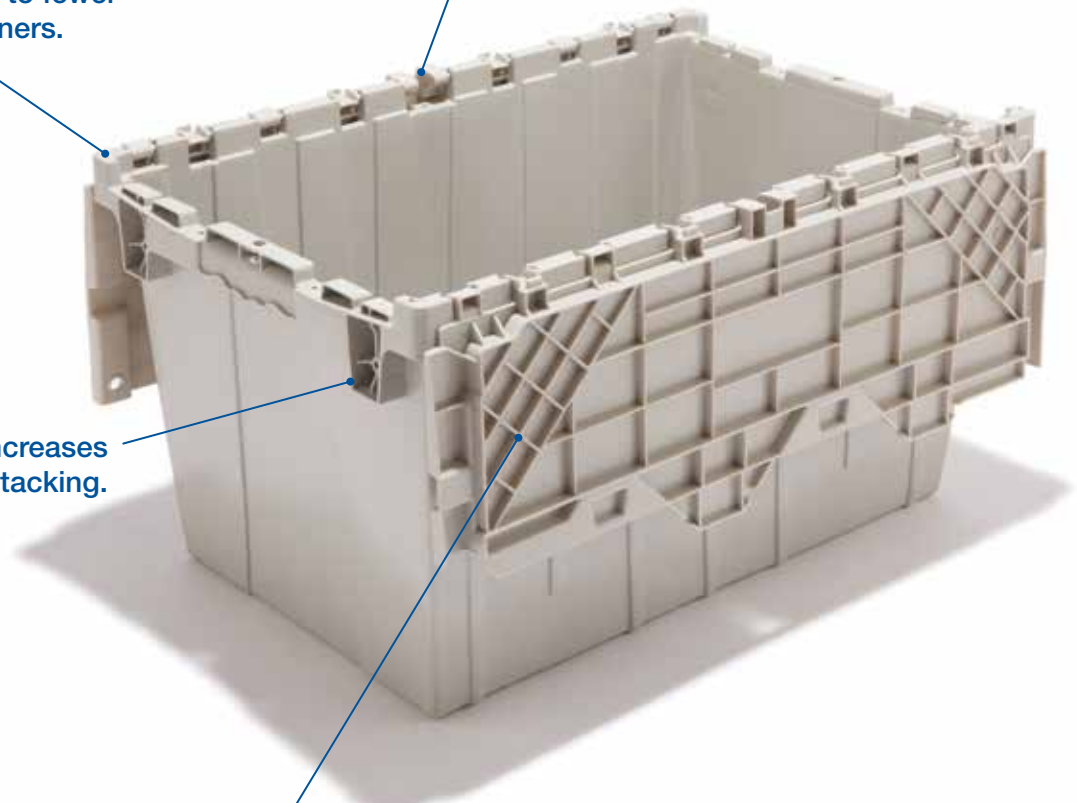

Monolfo's new distribution container design is loaded with features to make it the easy choice. By replacing the metal hinge pin and reinforcing several key impact areas, the new design is safer, cost-effective, stronger, more durable and 100% recyclable.

Secure plastic hinges make containers safer to handle and easier to recycle at end-of-life.

Stronger corner design means increased durability which translates to fewer damaged containers.

Enhanced nesting lug increases strength when stacking.

Redesigned lid features additional ribbing in critical impact areas.

Ask about our progressive buy-back program. We buy containers once they reach their useful end-of-life.

Standard, Heavy-duty and Moving

Nestable Containers with Attached Lids

- Ergonomic carrying handles
- Reinforced tie holes for minimizing lid damage
- Multi-fingered lid design provides tamper-resistant security
- “Traction” bottom surface prevents slippage on conveyors
- Optional recessed cross strapping lid for added security

Nestable Containers with Plastic Hinge
