## PRINTED CIRCUIT BOARD CARRIERS

- **Safe and Practical:** Printed circuit board carriers provide a safe and efficient handling system for delicate circuit boards.  $\frac{5}{8}$ " (13mm) slide spacing on center permits flexibility in separating boards for proper protection. Slides accommodate boards up to  $\frac{1}{8}$ " (9mm) thick.
- **Adjustable:** Slide panels are adjustable to exact width of boards to be handled. Moveable retaining bars enable boards to be put in or taken out from either side.
- **Stackable:** Two or three carriers of the same size can be stacked vertically to save floor space.
- **Large Capacity:** Up to 20 full-size boards can be accommodated in each of the different carriers. With the addition of double-sided center panels, two or more boards can be carried on each level, so carriers can hold from 40 to 60 12"x6" (305x152mm) boards.
- **Easily Transported and Stored:** PCB carriers can be transported and stored in a variety of modified and standard products made by InterMetro:
  - In PT Series tote box carriers;
  - In enclosed mobile cabinets;
  - In adjustable undershelf slides made to fit standard Super Erecta Shelf® shelf carts and trucks.
- **Conductive:** Made of chrome-plated carbon steel.
