19. Heavy-duty 14-gauge door—up to 52% thicker for extra durability
20. Quality manufactured in the USA

Know the Codes

Jamco flammable safety cabinets help keep companies compliant and are FM tested and approved. They also meet OSHA, NFPA code 30, and UFC 79 standards.

FM APPROVED   **OSHA®**   **NFPA®**

IMPORTANT: Some states require self-closing doors. As always, check with your local municipality to see if a self-closing door is required.

States Requiring Self-Closing Doors

■ Not Required (Check)   ■ Required   ■ Some Municipalities

Are You Compliant?

If a flammable safety cabinet has been modified, it DOES NOT meet code. Modifications can include (but are not limited to):

1. Adding a padlock
2. Welding I-bolts to assist with moving the cabinet
3. Additional venting added
4. External attachments to dispense liquids
5. Rust and other surface deterioration
6. Door doesn't close properly

What Color is Right?

There aren't any specific codes that identify color requirements for safety cabinets. Following are the best practices for selecting colors based on what is being stored:

| **Yellow**
Flammable Liquids | **Red**
Paints and Inks | **Blue**
Corrosives | **Green**
Pesticides, Insecticides | **Gray**
Hazardous Materials |

The Right Size and Style

Under-counter, countertop, narrow, self and manual close—we have all the popular sizes and configurations.
