 WWW.LOGITRANS.COM

The warranty covers material and assembly defects which, subject to inspection by us or our representative, are deemed to be faults or deficiencies that prevent normal use of the parts concerned. Such affected parts shall be sent to your Logitrans dealer carriage paid within the warranty period in force at the time in question, together with a copy of the documentation for the service performed (B284).

- The warranty does not cover normal wear and adjustments
- The warranty period is based on singleshift working

The warranty shall no longer apply if

- the product has been used incorrectly
- the product is used in environments for which it was not designed
- the product has been overloaded
- replacements of parts have been made incorrectly or original parts have not been used and consequential damages have arisen
- if the product is changed or accessories, not being approved by Logitrans, are used
- it can not be proved that a qualified technician has performed the service check according to the requirements stated in the instruction manual

Liability exemption

The manufacturer accepts no responsibility for personal injury or material damage arising from deficiencies, defects or improper usage. The manufacturer accepts no responsibility for lost earnings, operating losses, lost time, lost profits or similar indirect losses incurred by the purchaser or a third party.

Periodic service check

Service check is required once each year.

The service check is to be performed on the basis of form no. B280 and proved on form no. B284. Forms and instructions for the service check are available at your dealer.

Periodic safety inspection

Safety inspection should be performed by the dealer or other qualified persons at least once each year, unless local regulations state otherwise.

The safety inspection to be performed on the basis of form no. B278 and proved on form no. B284. Forms and instructions for the safety inspection are available at your dealer.
