DIMENSION LISTINGS

Dimensions given are outside unless otherwise stated and are rounded to the nearest inch where appropriate.

Most products are available on a "quick-ship" basis,

indicates stock items.

LOAD CAPACITIES

Load capacities listed in the charts are based on uniform loading.

PAINT OPTIONS

ANTIMICROBIAL PAINT

Designed primarily for beverage, food and pharmaceutical applications, while providing a level of cleanliness and protection between scheduled cleanings. This compound is inorganic. While incorporated at the point of manufacture, the additives are a permanent part of the ingredient in the paint. It is odorless, tasteless and colorless, the additive will not leech out or evaporate, allowing them to continuously fight the growth of microbes. There is an additional charge for this paint process.

FINISH COAT PRESERVATIVE

Strong Hold Products now offers paint that contains the preservative Intersept, which protects the cured paint film from bacteria, mold and premature deterioration due to their presence. There is an additional charge and leadtime for this finish. For more information please visit http://www.interfaceflooring.com/products/diversity/performance/intersept.html

POWDER COAT FINISH

Powder coating has become a very popular process for paint application. Strong Hold Products' powder provides a durable finished product. Product life is extended with our powder by providing excellent color retention, chemical and abrasion resistance. Coatings are consistent and environmentally safe.

At an additional charge our standard dark gray color is available for powder coating. This special finish will require longer product delivery times.

STANDARD CABINETS

THE ORIGINAL CLASSIC

ALL-WELDED DESIGN IS BUILT TO BE A TRUE SURVIVOR IN TODAY'S ROUGH AND RUGGED MANUFACTURING ENVIRONMENT

OUR NUMBER ONE SELLER:

Strong Hold's all welded EXTRA HEAVY DUTY storage cabinets are the smart way to store equipment. Manufactured from 12-gauge steel, these cabinets have all the Strong Hold features to last a lifetime.

These features include adjustable 14-gauge shelves with up to 1900# capacity each and can be adjusted in 2" increments. The three-point locking device, includes a hasp built into the handle for use with a padlock. The 7-gauge legs are welded on to provide mobility in lifting in order to move from one area to another.

YOU HAVE MADE THESE OUR BEST SELLING CABINETS. These heavy duty 12-gauge steel models provide protection for valuable tools and machine parts. These cabinets are built for "rough and tough" industrial use. More shelves can be

added for versatility.
